**About Us....**

In Kerala, unemployment among the professionally qualified graduates is very high. This situation can be attributed to the disproportionate quantum of graduates coming out of various technical institutions across Kerala and other states, to the job opportunities available at the upper management level in the state. There is, however, acute shortage of competent Manpower at the middle and lower level of management. This hampers the development of the state directly in various Industrial and Service Sectors.

As a remedial measure for this situation, Vocational Education has been introduced in Kerala.

This system of Education is meant for the students who have SSLC or equivalent qualification. The student has the freedom to select a Vocational course of his choice along with optional subject equivalent to +2 in four groups. The department of Vocational Higher Secondary Education awards a trade certificate in Vocational Higher Secondary Education in the discipline concerned. The maximum strength of a batch of any course is 25 students. It is a distinct stream intended to prepare students for identified occupations on one side and to higher studies on the other.
